# BUSINESS MODEL CANVAS

## Value Propositions

- Faster Diagnosis
- Accuracy & Safety
- Healthcare Efficiency
- Clinical Support

## Key Activities

- Processing and analyzing medical images
- Generating a diagnostic result
- AI model development and training
- DB and cloud server management
- System security and patience data authentication
- Hospital and diagnostic center partnerships
- System deployment and medical staff training

## Key Resources

- AI medical vision platform
- Backend servers
- Cloud infrastructure
- Medical image databases
- Deep learning model
- System integration tools (HIS/PACS)
- Proprietary AI algorithms
- Trained diagnostic models
- Secure data handling protocols
- Clinical workflows.

## Key Partnerships

- Cloud service provider (AWS, Azure, Google Cloud,...)
- Hospitals and diagnostic labs
- Telemedicine providers
- Medical colleges for R&D
- Medical imaging equipment manufacturers
- Cybersecurity service providers
- Data annotation teams (radiologists)
